SURVEY QUOTES

It is imperative that the west side of our town have a safe, inviting, and modern recreation facility.

Would love to see this used in part by a swim and dive team.

A family friendly place, with a play area in the water for small children would be nice.

More parking.

We use the skate park often. It's a really good skate park! My kids like to roller skate and use scooters there and my husband rides his skateboard.
